| **EXAMPLE OF Title** (what do you want to do?) using (what type of technology or language or codes?) for (who are the user or reason ) | **Topic** - Main idea to start Research Background section. -start from general to narrowed topic. | **Problem** (represented by negative words that show problematic issue of the chosen topic | **Objectives** 3 fixed objectives as check list for all students (identify – develop – test) | Scope 4 main content that help to narrowed down the findings. (function, content, target user, geographical area) | **Significance of the study** Benefits of the project. |
|---|---|---|---|---|---|
| KickersAR: Development of Interactive Mobile Apps using AR for Hyperactive Kids Learning ABC | Learning ABC (many ways of learning with many tools and apps); tool for learning ABC for kids (hyperactive) | - not many choices of interactive tool for learning ABC (most are one way method).<br>- not using multimedia (most are using one or two media eg text, audio only. | O1 – to identify main problem related to hyperactive kids learning ABC.<br>O2 – to develop prototype of interactive mobile apps using AR (KickersAR) based on the problems discover in O1.<br>O3 – to test the functionalities of prototype developed in O2. | **Function** – based on the expertise (or knowledge) of the researcher (eg AC10 on computer based and SE, so the function is on the specific features in the prototype (can be relate to overcome the problem statement) develop a prototype system of mobile apps using AR (Unity 3D) that can capture user feedback by their physical movement. The prototype also will include all multimedia which are text, audio, 3d image, graphic n video) as reward for user interaction.<br>**Content** – the main content of the system.. ABC (Language)<br>**Target user** – who are the targeted users. Eg. hyperactive student aged 5-7 yrs old, teacher, parents.<br>**Geographical Area** – so we can suit with the surroundings, communities' need etc. Eg in Tanjong Malim, in Ulu Slim, in Putrajaya. | One way of presenting significant is discussion of Benefits for the following targeted users;<br>**Students** – will enjoy their study better with interactivity elements an rewards given in KickersAR.<br>**Teacher** – will perform one more varieties of methods for their TnL session, that hopefully will attract the students to involve in the TnL process.<br>**Parent** – will soon get a relief and proud of their child performance and improvement especially on learning ABC. |

Based on the above sketches, we need to transform the idea into nice sentences with correct grammar and suitable words.

## 1 Abstract

**Past**
To talk about actual results.

**Present**
To talk about general facts, the paper itself or analysis of findings.

## 2 Introduction

**Present**
To talk about general background information.

**Present Perfect**
To talk about previous research.

## 3 Methods

**Past**
To talk about what you did.
TIP: passive voice is common.

**Present**
To explain diagrams/figures.
Ex: Table 1 shows...

## PAST

To talk about events that have been completed.
Ex1: We **found** that...
Ex2: Protocol X **was followed**. [Passive voice]

## PRESENT PERFECT

To talk about events that started in past but are still ongoing or recently completed.
Ex: Many experiments **have focused** on...

## PRESENT

To talk about events that are general fact, discuss current meanings, and suggest future applications.
Ex1: Insulin and glucagon **regulate** blood glucose levels.
Ex2: Increased hormone production **indicates**...

## 4 Results

**Past**
To talk about actual results.

**Present**
To explain diagrams/figures.
Ex: Table 1 shows...

## 5 Discussion

**Present**
To interpret and talk about significance of findings.

**Past**
To briefly summarize findings.

## 6 Conclusion

**Past**
To refer to your completed research.

**Present**
To talk about implications and suggest future research.
